

ABSTRACT

A plant packaging and covering system including a floral sleeve having a decorative pattern thereon. The sleeve may have a lower portion sized to cover a pot and an upper portion which can surround a plant disposed in the pot and which can be detached after the protective function of the upper portion is complete or which can be used to support the sleeve from a support device prior to use. The decorative pattern preferably has an arcuate upper boundary in the flattened condition which when opened, gives the sleeve the appearance of having an upper edge which is parallel to the upper rim of the pot disposed within the sleeve.
